Claim/Reference #:	123456
Name:	John Jones
Claimed Date of Loss:	N/A
Search Period:	10/26/2023 - 10/26/2026
Property Location:	123 Main St, Buda, TX, 78610

Latitude: 30.0887345 **Longitude:** -97.8192771 **County/Parish:** HAYS

We have reviewed radar data, ground reports and other data for the stated period and location. As a result, we have identified the following verifiable instances of hail and winds >= 50 mph at that location:

•05/20/26 (Image 1): High resolution radar data and/or ground reports indicate that wind gusts of 40-50 mph occurred from a general South/Southeasterly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•05/09/26 (Image 2): High resolution radar data indicates that hail of 0.25-0.5" in diameter occurred at the property location on this date. The estimated duration of the hailfall was approximately less than 1 minute.

•05/09/26 (Image 3): High resolution radar data and/or ground reports indicate that wind gusts of 50-60 mph occurred from a general West/Northwesterly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•03/15/26 (Image 4): High resolution radar data and/or ground reports indicate that wind gusts of 50-60 mph occurred from a general Northerly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•05/27/25 (Image 5): High resolution radar data and/or ground reports indicate that wind gusts of 50-60 mph occurred from a general South/East direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•05/26/25 (Image 6): High resolution radar data and/or ground reports indicate that wind gusts of 50-60 mph occurred from a general North/Northwesterly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•03/23/25 (Image 7): High resolution radar data and/or ground reports indicate that wind gusts of 50-60 mph occurred from a general North/Northwesterly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•03/15/25 (Image 8): High resolution radar data and/or ground reports indicate that wind gusts of 40-50 mph occurred from a general Westerly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•03/04/25 (Image 9): High resolution radar data and/or ground reports indicate that wind gusts of 40-50 mph occurred from a general West/Southwesterly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•06/05/24 (Image 10): High resolution radar data and/or ground reports indicate that wind gusts of 40-50 mph occurred from a general North/Easterly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•05/16/24 (Image 11): High resolution radar data and/or ground reports indicate that wind gusts of 50-60 mph occurred from a general North/Northwesterly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•02/02/24 (Image 12): High resolution radar data and/or ground reports indicate that wind gusts of 40-50 mph occurred from a general Southerly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•01/12/24 (Image 13): High resolution radar data and/or ground reports indicate that wind gusts of 50-60 mph occurred from a general West/Northwesterly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

•01/08/24 (Image 14): High resolution radar data and/or ground reports indicate that wind gusts of 50-60 mph occurred from a general North/Westerly direction at the property location on this date. The wind gusts were likely instantaneous and brief with a duration of less than 3 minutes.

Other Supporting Information:

•03/23/25: A ground report of 60 mph wind was received 2.4 miles from the property location on this date.

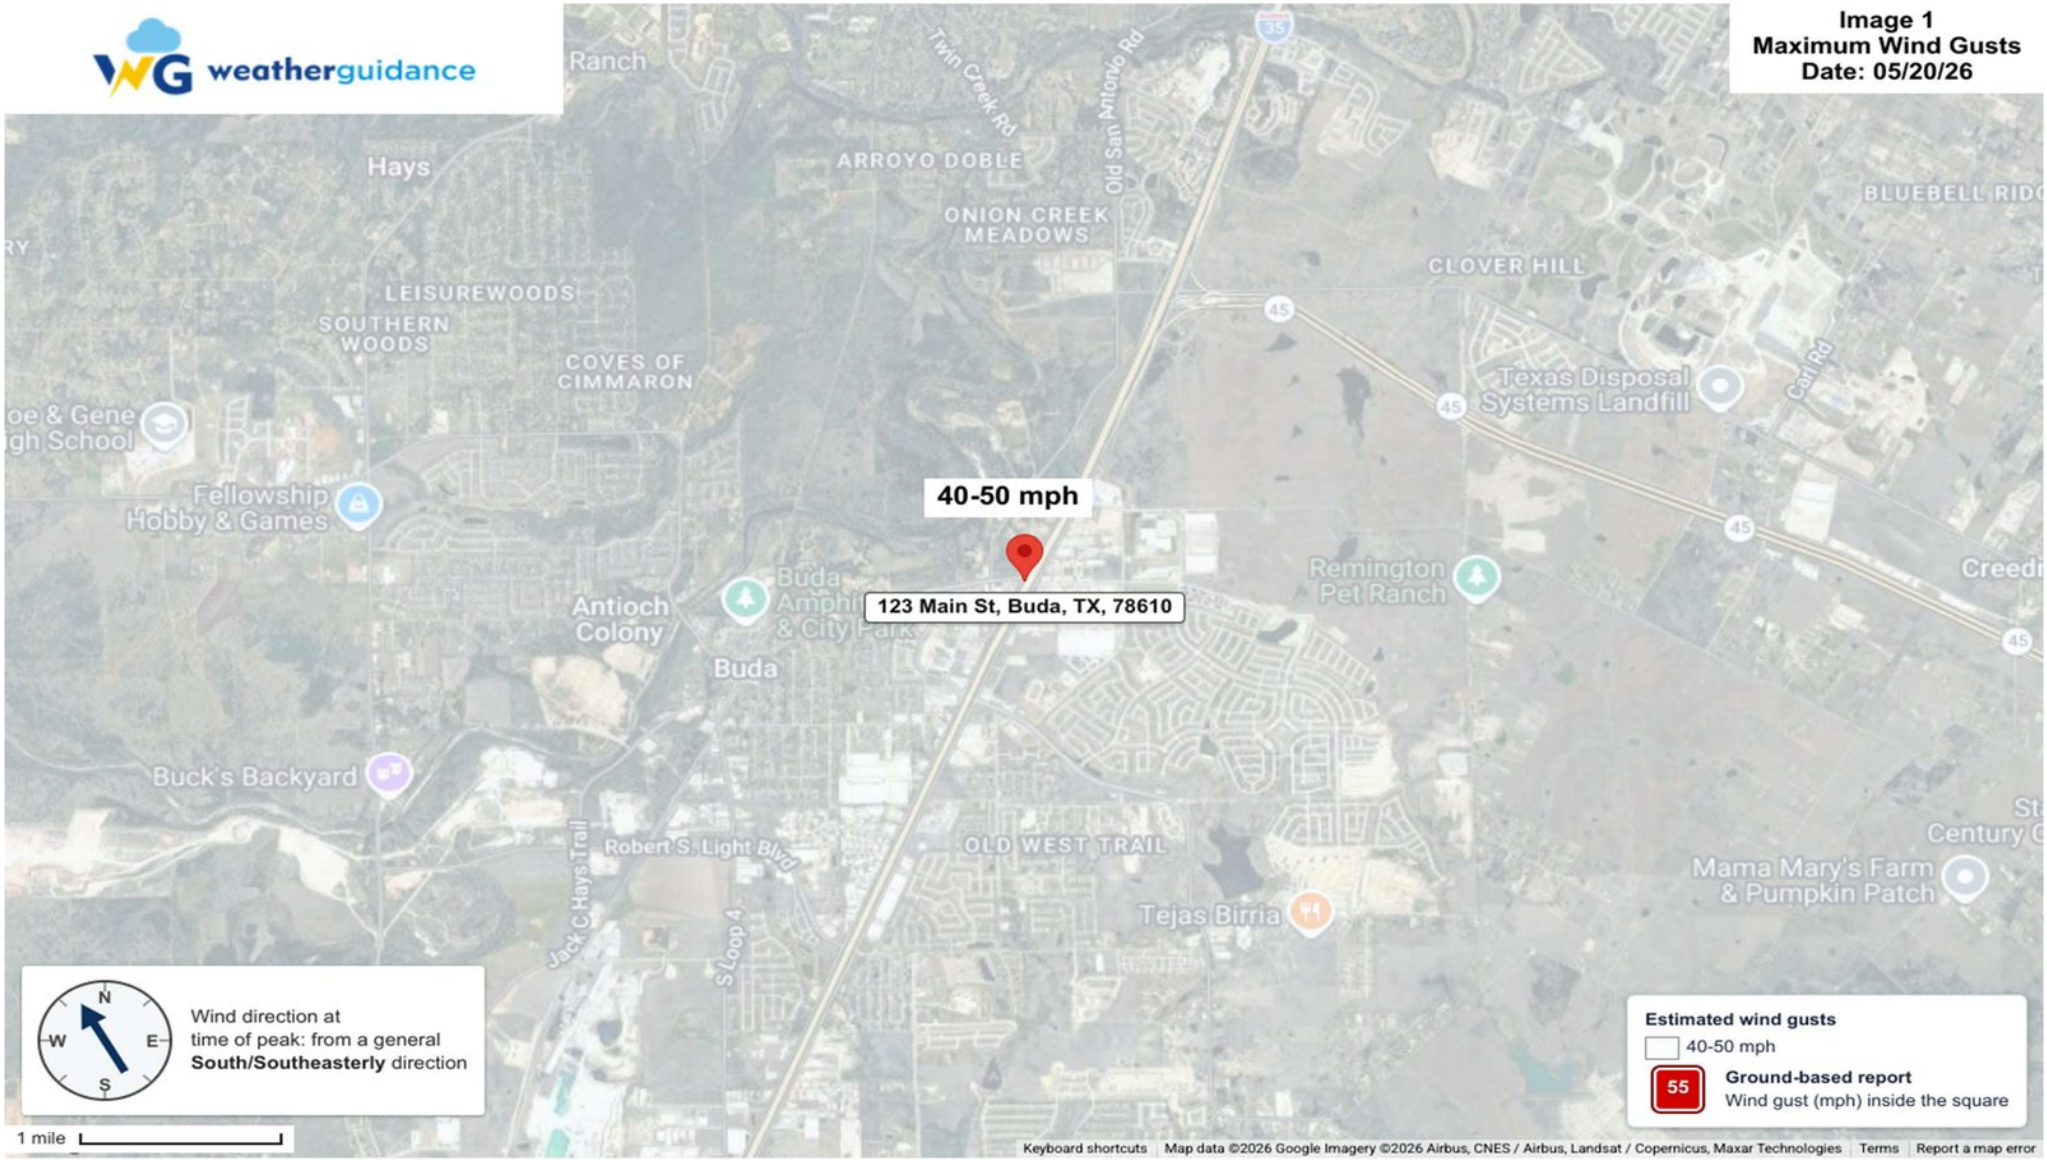

I hereby attest that the above information is true and correct to the best of my knowledge and professional opinion as indicated by my signature below on this 27th day of October, 2026.
