

SITEWARN™ FOR WATER PARKS

Clear the pools in time. Reopen when it's actually safe.

Lightning is the whole game for a water park, and the government doesn't warn on it. SiteWarn™ puts live meteorologists on your exact footprint 24/7/365, warns your aquatics staff at the radius your policy calls for with time to clear every pool and slide, and gives you a real all-clear based on where the last strike actually was — so guests are back in the water in minutes, not sitting in the parking lot for an hour.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why water parks and aquatic centers choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no public warning for cloud-to-ground lightning. We track every strike, alert you at the radius your policy calls for — 10 miles, 8 miles, whatever you set — and give you time to clear pools, slides and wave pools before the first strike in range.

A real all-clear, not a guess

The 30-minute rule only works if you know where the last strike was. We time your all-clear from the actual last strike inside your radius, so you reopen as soon as it's safe instead of adding another 30 minutes every time someone hears thunder.

Your park, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact footprint. A storm passing well north of you shouldn't empty your pools — and when the NWS warns your county but your park is clear, a null-warning notification tells you so.

Alerts your way, unlimited users

Portal, app, email, text or push, and a live phone call to the aquatics director or duty manager — to lifeguard supervisors, guest services and operations. Interactive radar with your park mapped, at no extra cost per user. Seasonal programs available.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
