

SITEWARN™ FOR AMUSEMENT PARKS

Clear the rides in time. Reopen the moment it's safe.

Every ride closure costs throughput and guest goodwill; every closure that wasn't needed costs it for nothing. SiteWarn™ puts live meteorologists on your exact park footprint 24/7/365, warns operations about lightning, wind and severe weather at your thresholds with time to clear rides, pools and queues — and gives you a real all-clear so you reopen minutes, not hours, after the threat passes.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why parks choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no public warning for cloud-to-ground lightning. We track it and alert you in time to clear rides, pools and queues before a strike — and give you the all-clear when the last strike is far enough behind you to reopen.

Your park, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact footprint and alert only when there's a real threat to you. A storm passing ten miles north shouldn't close your coaster.

Null warnings cut false alarms

When the NWS warns an area that includes you but your site is clear, we tell you — avoiding needless evacuations, shutdowns and lost revenue, and keeping your ride ops crews responsive when a warning is real.

Wind thresholds by ride

Your tallest coaster, your drop tower and your carousel don't have the same wind limit. You set the threshold per ride or ride group; we warn on each with onset and end timing so operations closes and reopens in the right order.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.
