

SITEWARN™ FOR CHEMICAL PLANTS AND REFINERIES

Clear the rack. Keep the unit running.

A county-wide warning forces a choice between crew safety and production. SiteWarn™ takes the choice away: live meteorologists watch your unit footprint, tank farm and loading racks 24/7/365 and warn EHS and the control room about lightning, wind and severe weather at your thresholds — and tell you when a warning on the news doesn't apply to your fence line.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why plants and refineries choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no public warning for cloud-to-ground lightning — the single biggest day-to-day hazard for crews on tank farms, loading racks, cooling towers and open structures. We alert you in time to clear personnel before a strike, and give an all-clear so they aren't standing inside longer than necessary.

Your fence line, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact unit footprint. Warnings name the hazard, the threshold and the time window, so you stop the work that's actually at risk — a rack, a scaffold, a lift — not the whole plant.

Protect production from false alarms

When the NWS warns an area that includes you but your site is clear, we tell you. Needless unit slowdowns, shutdowns and restarts can run to six figures per event; null-warning notifications are how our clients avoid them without accepting more risk.

Wind, flood and freeze at your numbers

Crane lifts, flare operations, cooling-tower work and turnaround scaffolds each have their own wind limit. You set the thresholds for each; we warn on each, delivered to EHS, the control room, security and contractors through the portal, app, phone, text, email or API into your plant notification system.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
