

SITEWARN™ FOR CORPORATE CAMPUSES

Shelter a campus of 5,000 only when it counts.

Sending the whole campus to the stairwells for a county warning that never arrives costs an afternoon of productivity and a little more credibility every time. SiteWarn™ monitors your exact campus 24/7/365 and gives security and facilities a warning with real arrival timing when a storm is actually coming — and a null-warning notification when it isn't — plus winter-weather calls days ahead for closures and remote-work decisions.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why corporate campuses choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Your campus, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact campus and warn only when there's a real threat to your buildings, with expected arrival time. When the NWS warns your county but the storm won't reach you, a null-warning notification tells security so.

Lightning for the people outside

The National Weather Service issues no warning for cloud-to-ground lightning. Grounds crews, the loading dock, the campus shuttle stop, the outdoor cafeteria and the company softball field are all exposed; we warn facilities and security in time to bring people in.

Closure and remote-work calls days ahead

Winter storms, ice and large-scale wind events are warned days out, not hours — watches up to 7 days ahead, warnings by day 5, with onset and end timing — so HR and facilities can make the closure or work-from-home call the day before instead of the morning of.

Every office in the portfolio

A headquarters, three regional offices and a distribution center rarely face the same weather at once. Multi-site programs cover each with its own thresholds and contacts on a group rate, with unlimited users and delivery through the portal, app, phone, text, email or API into your mass-notification platform.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
