

SITEWARN™ FOR DATA CENTERS

Turn uptime from luck into procedure.

Lightning is the leading weather cause of grid drops, and the government doesn't warn on it. SiteWarn™ puts live meteorologists on your exact site 24/7/365, alerting your NOC in time to verify generators, switch to standby fuel and stage on-call staff before the hit — and telling you when a county warning doesn't reach your building, so you're not burning diesel on a false alarm.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why data centers choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning and storm warnings the NWS won't give you

The National Weather Service issues no warnings for cloud-to-ground lightning — the leading weather cause of grid drops and equipment damage. We alert your NOC in time to pre-stage and verify backup systems before the hit, and stand you down when the threat has passed.

Your site, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact site so your operations team only acts when there's a real threat — no false-alarm failovers, no unnecessary diesel burns, no wasted on-call hours.

Pre-activate backup before it's needed

Advance warning on inbound severe weather lets your team verify generators, switch to standby fuel, secure rooftop and yard equipment and stage on-call staff before utility issues start — so the runbook runs on a schedule instead of a scramble.

Into the NOC however it works

Portal, app, email, text or push, phone (live or recorded) — or straight into your DCIM, BMS or ticketing system by API — to the NOC, facilities, security and on-call engineers. Interactive radar with every site mapped, at no extra cost per user.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
