

SITEWARN™ FOR EVENT VENUES

Move the ceremony only when you have to.

A TV forecast with a 40% chance of storms and a county warning that never reaches your property can wreck an event that was going to be fine. SiteWarn™ puts live meteorologists on your exact venue 24/7/365 — an hour-by-hour forecast for the event, lightning and wind warnings at your thresholds if a storm really is coming, and a meteorologist on the phone when the planner is asking what to do.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why venues, planners and event operators choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no public warning for cloud-to-ground lightning — the hazard that actually ends outdoor events. We alert you in time to move guests under cover before a strike, and tell you when it's safe to go back out.

Your venue, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact property. When a county warning includes you but the storm won't reach your lawn, a null-warning notification says so — and the ceremony stays outside.

An hour-by-hour forecast for the event itself

Two days out, the day before and the morning of, you get a forecast written for your site and your timeline: when rain is likely, when it isn't, wind for the tent, heat for the guests. It's the difference between a nervous client and a confident one.

A meteorologist on the phone

When the planner calls at 3 p.m. asking whether the 5 p.m. ceremony moves inside, you can call us. Single-event, seasonal and year-round programs; unlimited staff on the alerts at no extra cost.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
