

SITEWARN™ FOR FAIRS, CARNIVALS AND SHORT-RUN EVENTS

The gates are open. The storm is an hour out.

A TV forecast with a 40% chance of storms and a county warning that never reaches your fairgrounds can shut down a gate day that was going to be fine. SiteWarn™ puts live meteorologists on your exact grounds 24/7/365 — an hour-by-hour forecast for the run of the event, lightning and wind warnings at your thresholds if a storm really is coming, and a warning sent by a meteorologist when the call has to be made.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why fairs, carnivals and event operators choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no public warning for cloud-to-ground lightning — the hazard that actually clears the grounds. We alert you in time to get guests off rides and out of open ground, and tell you when it's safe to reopen.

Your grounds, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact footprint. When a county warning includes you but the storm won't reach the fairgrounds, a null-warning notification says so — and the gates stay open.

Wind thresholds for rides, tents and structures

Portable rides, big-top tents, inflatables, stages and vendor canopies each carry a wind limit. You set the numbers; we warn on each one, with the lead time it takes to stop loading and get people clear.

Built for a short run, not a season

A weekend festival, a ten-day fair, a one-night carnival. Programs run single-event, seasonal or year-round, with unlimited staff on the alerts at no extra cost.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
