

SITEWARN™ FOR HEALTHCARE

Move critical patients before the storm, not during.

Relocating ICU and NICU patients, securing the helipad and briefing clinical staff takes time a county warning doesn't give you. SiteWarn™ monitors your exact campus 24/7/365 and warns emergency management with the lead time you set — and tells you when a warning on the news doesn't reach your buildings, so you only mobilize when you actually need to.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why healthcare facilities choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Move critical patients before the storm

Advance warning on inbound severe weather gives your team time to relocate ICU, NICU and dialysis patients to interior safe areas, secure rooftop helipad operations and brief clinical staff — before, not during, the event. You set the lead time; we work back from it.

Your campus, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact campus and alert only when there's a real threat — so you only mobilize when you actually need to, and staff keep trusting the alert when it comes.

Pre-activate generators and supplies

Advance notice lets facilities verify backup power, top off fuel, secure exterior equipment and pre-stage emergency supplies before damage starts — protecting continuity of care when minutes matter. Large-scale wind and ice events are warned days out.

Alerts your way, unlimited users

Portal, app, email, text or push, phone (live or recorded) — or into your mass-notification or incident-command system by API — to emergency management, facilities, security and clinical leadership. Interactive radar with your campus mapped, at no extra cost per user.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.
