

SITEWARN™ FOR MANUFACTURING

When weather threatens your plant, guessing isn't a plan.

Every false-alarm shutdown costs production hours and restart money; every missed warning costs more. SiteWarn™ puts live meteorologists on your exact facility 24/7/365, warning EHS and plant ops about lightning, tornadoes, hail and wind at your thresholds — and telling you when a county warning doesn't reach your gate.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why plants choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no public warning for cloud-to-ground lightning — the biggest day-to-day hazard for crews in the yard, on loading docks, on roofs and in open structures. We alert you in time to bring people inside, and give an all-clear when it's safe to go back out.

Your facility, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact plant footprint — so you only stop work that's actually at risk, not the whole operation.

Protect production from false alarms

When the NWS warns an area that includes you but your site is clear, we tell you — avoiding needless shutdowns, sheltering and restart costs that can run into six figures per event, and keeping your people responsive when a warning is real.

Tornado sheltering with real timing

A tornado warning that covers your county doesn't tell you whether to move 400 people off the floor. A SiteWarn warning does: expected arrival time at your building, updates as the storm evolves, and a meteorologist on the phone if the call is close.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
