

SITEWARN™ FOR PARKS, GOLF AND SPORTS COMPLEXES

Clear the course in time. Get players back out fast.

Nobody is more exposed to lightning than a foursome on the back nine or a tournament on eight open fields — and the government doesn't warn on it. SiteWarn™ puts live meteorologists on every property 24/7/365, warns your staff at the radius your policy calls for with time to clear players, and gives a real all-clear so play resumes minutes after the last strike, not an hour later.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why clubs, complexes and parks departments choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no public warning for cloud-to-ground lightning. We track every strike and warn you at your radius with enough time to get players off the course and off the fields, then time your all-clear from the actual last strike so play resumes as soon as it's safe.

Your property, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor each course, complex and park individually. A storm passing north of town shouldn't clear your tournament — and when the NWS warns your county but your property is clear, a null-warning notification tells you so.

Tournament and league decisions with real timing

Suspend play now or finish the hole? Hold the 6 p.m. games or cancel? SiteWarn gives the tournament director the arrival time of lightning and severe weather at the property, and a meteorologist on the phone for the call.

Every property in the department on one program

Parks departments with a dozen fields and three pools, and club groups with several courses, get per-property thresholds and contacts on a single group-rate program, with unlimited staff on the alerts at no extra cost.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
