

SITEWARN™ FOR SCHOOL DISTRICTS

Every campus watched. Every warning specific to that campus.

A county-wide warning tells you nothing about which of your campuses is actually in the storm's path. SiteWarn™ monitors each school, stadium and bus yard 24/7/365 and gives your safety, athletics and campus staff lightning, tornado, hail and wind warnings — with the timing you need for dismissal, practice and sheltering decisions.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why school districts choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no warning for cloud-to-ground lightning — the hazard your students face most often on practice fields, playgrounds and at Friday night games. We alert coaches and campus staff in time to clear the field, and tell them when it's safe to go back out.

Campus by campus, not county by county

A district with 20 campuses rarely has all 20 in a storm's path. We monitor each campus, stadium and transportation yard individually, so the elementary school on the north side shelters and the high school on the south side keeps testing.

Timing for dismissal, buses and events

Hold the buses or release them? Move the game up or call it? SiteWarn gives administrators the arrival time of severe weather at each campus, and a meteorologist on the phone when the call is a close one.

Fewer needless shelter-in-place drills

When the NWS warns the county but a campus isn't threatened, staff get a null-warning notification. Students aren't pulled into hallways for a storm that isn't coming, and staff keep taking warnings seriously when one is.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.
