

SITEWARN™ FOR SUMMER CAMPS

Time to get every camper to shelter.

Getting 300 kids off the waterfront, out of the woods and into shelter takes longer than a county warning allows — and the NWS doesn't warn on lightning at all. SiteWarn™ monitors your property 24/7/365, warns your directors with the lead time your camp needs, covers cabins and tent sites overnight, and puts a meteorologist on the phone when the decision is hard.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why camps choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no warning for cloud-to-ground lightning — the hazard campers face most, on the lake, on ropes courses, on ball fields and on trails. We alert your director and activity leads in time to clear the waterfront and bring groups in, and tell them when it's safe to go back out.

Your property, not the whole county

Instead of an oversized warning covering thousands of square miles, we monitor your exact property and alert only when there's a real threat. Fewer needless all-camp shelters means counselors keep taking the whistle seriously when it's real.

Overnight tornado and flash-flood coverage

Cabins and tent sites are the hardest thing to protect at 2 a.m. We watch all night, warn your on-duty staff by phone call with expected arrival time, and cover flash flooding on creeks and low crossings that county warnings often miss.

Alerts your way, unlimited users

Portal, app, email, text or push, and a live phone call to whoever is on duty — to the director, program staff, waterfront, nurse and kitchen. Interactive radar with your property mapped, at no extra cost per user. Seasonal programs available for the weeks you're open.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
