

SITEWARN™ FOR UNIVERSITIES

Every campus, every field, every game — watched by a meteorologist.

A county warning can't tell emergency management whether to move 30,000 people, or tell the athletic director whether Saturday's kickoff holds. SiteWarn™ monitors every campus, stadium and field individually, 24/7/365, and gives your team lightning, tornado, hail and wind warnings with the timing to decide — plus a meteorologist on the phone when the call is close.

24/7/365 Live meteorologists monitoring your site	\$99.95 Per month, single site. Group rate for multi-site	14 yrs Serving weather-sensitive operations	Unlimited Users, at no extra cost per person

— Why universities choose SiteWarn

A fully customized program: you set the thresholds, we watch the weather.

Lightning warnings the NWS won't give you

The National Weather Service issues no warning for cloud-to-ground lightning — the hazard your students and athletes face most, on practice fields, at games, on quads and in outdoor labs. We alert athletics and campus safety in time to clear the field, and tell them when it's safe to go back out.

Campus by campus, field by field

A main campus, a medical campus, a satellite site and a stadium across town rarely face the same storm at the same time. We monitor each individually so the shelter order goes to the buildings that need it and the rest of the institution keeps working.

Game-day and event timing

Delay kickoff or play through? Clear the stadium or hold? SiteWarn gives event operations the arrival time of lightning and severe weather at the venue, updates every few minutes as the storm evolves, and a meteorologist on the phone for the decision.

Fewer campus-wide shelter orders that weren't needed

When the NWS warns the county but your campus isn't threatened, emergency management gets a null-warning notification — so you don't send a shelter-in-place to 30,000 phones for a storm that isn't coming, and people keep taking the alert seriously when it's real.

— SiteWarn™ vs. free weather information

What you actually get when the storm is close enough to matter.

Capability	SiteWarn™	NWS	Internet / TV
Warnings drawn to your site, not the county	✓	✗	✗
Cloud-to-ground lightning warnings	✓	✗	✗
Thresholds you define, site by site	✓	✗	✗
Told when a warning does <i>not</i> apply to you	✓	✗	✗
A meteorologist you can call	✓	✗	✗
24/7/365 coverage	✓	✓	✗
